

Empowering a greener tomorrow

About Us

Tyler Hill Consulting is an energy infrastructure services platform, providing speciality services and full turnkey solutions to renewable energy developers/asset owners across various markets globally.

We have a 30 member strong team of engineers, planners, designers and project managers across offices in UK, India and UAE supporting development of over 2 GW of renewable energy projects in United Kingdom and India.

Why Us?

Tyler Hill Consulting's professional O&M and TAM service ensures that the RE system will maintain high levels of technical and consequently economic performance over its lifetime. High quality O&M services mitigates potential risks, improves the Levelised Cost of Electricity (LCOE).

Availability guarantees provided can be translated into bonus schemes and liquidated damages. These ensure that the asset owner is compensated for losses due to lower-than-guaranteed availability and that we are motivated to improve their service in order to achieve higher availability.
