

Enabling *sustainable* projects from selection to execution.

About Us

Tyler Hill Consulting is a UK-based planning consultancy offering comprehensive support across all scales of planning services, both in the UK and overseas. We are suited to provide services ranging from small scale private developers to national corporations in both the private and public sectors and currently work with national corporations on projects including renewable energy development.

Our expertise covers everything from site selection and feasibility to securing planning permission and managing stakeholders, ensuring sites reach ready-to-build status.

Why Us?

Our planning team consists of a strong group of planners with various areas of expertise across the private and public sector, as well as sectors of planning. Our team have worked on developments such as regeneration, small to large scale residential, commercial as well as rooftop to utility scale renewable energy.

As a team we continually seek to develop our in-house capabilities to ensure we provide our best service, based on real time developments in the planning sector and hiring committed experts in their field.

Our Team

The Tyler Hill Consulting planning team consists of four planners, two planning assistants and one planning graduate. The teams head of service and principal planner lead on project strategy and delivery, with a combined 18 years' experience in the planning and design sector.

We are supported by our assistant planners, with experience in both planning and architecture, as well as our graduate planner, who is pursuing a specialism in landscape architecture to support the team on landscape and visual assessments for projects. Together, we are a design conscious team putting sustainability at the forefront of all developments.

Our Services

- Site selection and early feasibility assessments (desktop and on-site).
- Planning strategy and advice, including budget preparation for all stages.
- Pre-application letters and meetings, EIA screening and scoping submissions.
- Managing and supporting at public consultation, public presentations and planning committee events.
- Designing and providing planning advice on site designs throughout the process, and including external consultant input.
- Managing all external consultant negotiations, stakeholder relations (including Local Planning Authority) and input on projects, including project management.
- Preparing documents for formal planning submission (planning statement, site selection, farm diversification, statement of community involvement application form and certificates etc.).
- Discharging planning conditions, amendments to planning application/ conditions and all ready to build activities.

Previous Projects

Through our on-going partnership with NeraWatt Renewables, and projects with IB-Vogt and AMPYR Renewables, we have successfully supported on utility scale renewable energy projects, ensuring our specialism in the renewable energy industry.

Looking Forward

We now seek further projects and partnerships to utilise our skilled teams capabilities across the planning sector, to grow our brand and support further sustainable development.
